Professional Summary

I am a final year BCs Computer Science student at Kingston University with experience from various projects that I undertake during my degree and in my spare time. I am focused and driven. I developed great critical thinking and collaboration skills through working in a team. Curiosity for technology keeps me interested in learning new things and pushing myself constantly to achieve more. I would like to further evolve my expertise in software development and implement my knowledge in real-life projects.

Experience

Academic Mentor   **09/2022 to Current**
