Professional Summary

As a final year BSc Computer Science student at Kingston University, I have demonstrated strong leadership, problem-solving, and analytical thinking skills in various projects throughout my academic and professional experiences. My passion for technology drives me to continuously learn and adapt to new challenges, allowing me to excel in various roles across diverse industries. I am adept at leading teams, streamlining processes, and finding innovative solutions to complex problems. Eager to further develop my expertise in software development, I am committed to applying my knowledge and skills to make a lasting impact on real-life projects.

Skills

- Front end: JavaScript, React, React Native, HTML, CSS, Bootstrap
- Back-end: NodeJS, Express, Java
- Database: MySQL
- Testing: Jest
- Tools: Bash, Docker, Git, VSCODE, Postman, AWS, Jira
- Techniques and Methodologies: Agile PM (Scrum)
- Other: Python (mainly for Machine Learning with NumPy, Pandas, Matplotlib, Seaborn and Scikit-learn)

Experience

Academic Mentor   **09/2022 to Current**
Kingston University
- Breaking down complex programming concepts into simple, easy-to-understand language.
- Facilitating and assisting in programming workshops and labs.
- Providing feedback to lecturers on student performance and areas for improvement.

Delivery Driver   **03/2020 to 12/2022**
Amazon Prime
- Providing training and guidance to new delivery drivers on safe driving practices, package handling, and customer service.
- Evaluating the performance of new drivers and providing feedback and coaching to help them improve their skills.
- Managing my time effectively to ensure that all deliveries are completed by the requested deadline.
- Delivering packages to customers in a timely and efficient manner.
